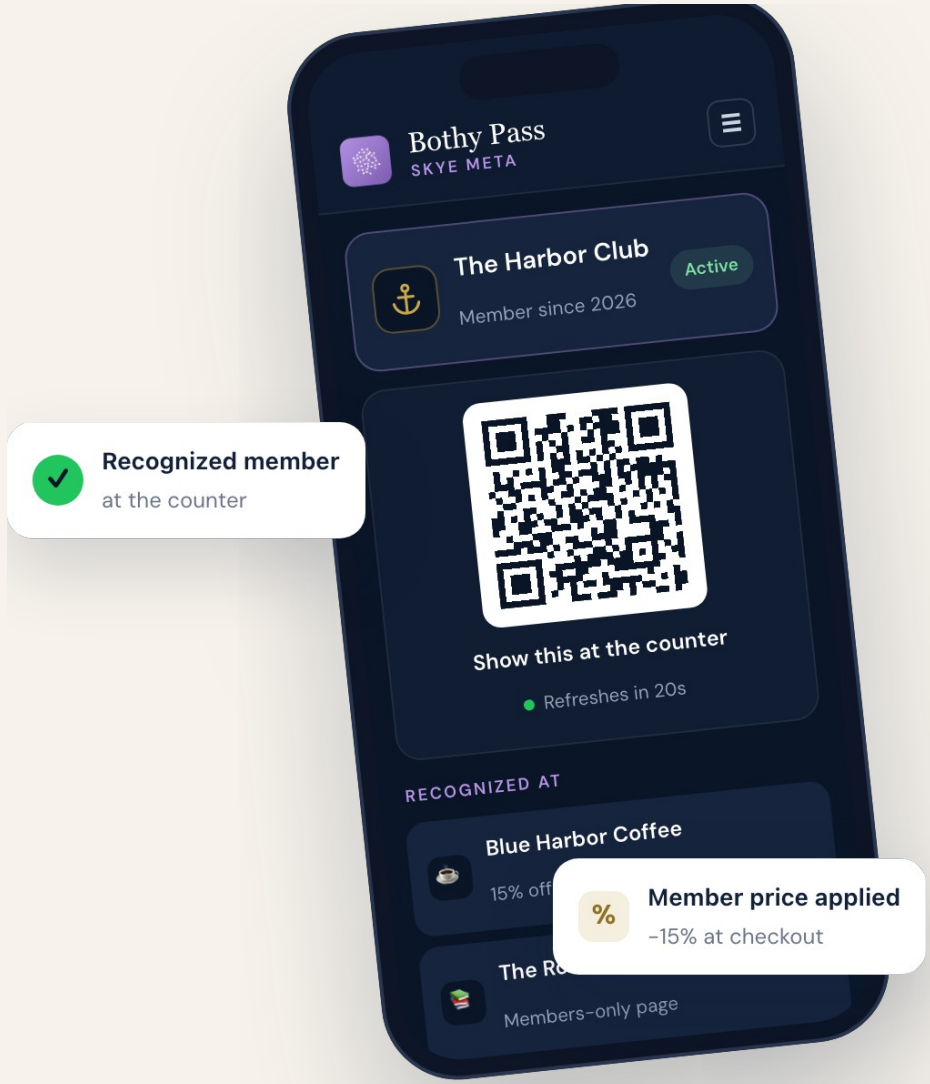
One membership. *Recognized* everywhere.

Give your people a pass. It opens your website, your online store and your counter, and members never pay.

- Your website
- Your online store
- Your counter



THE PROBLEM

A membership only works inside your own *walls*

To make it count anywhere else, a club has to hand something around. Each option fails in its own way.

01

Coupon codes leak

One code gets passed along to everyone, member or not. The discount stops meaning anything.

02

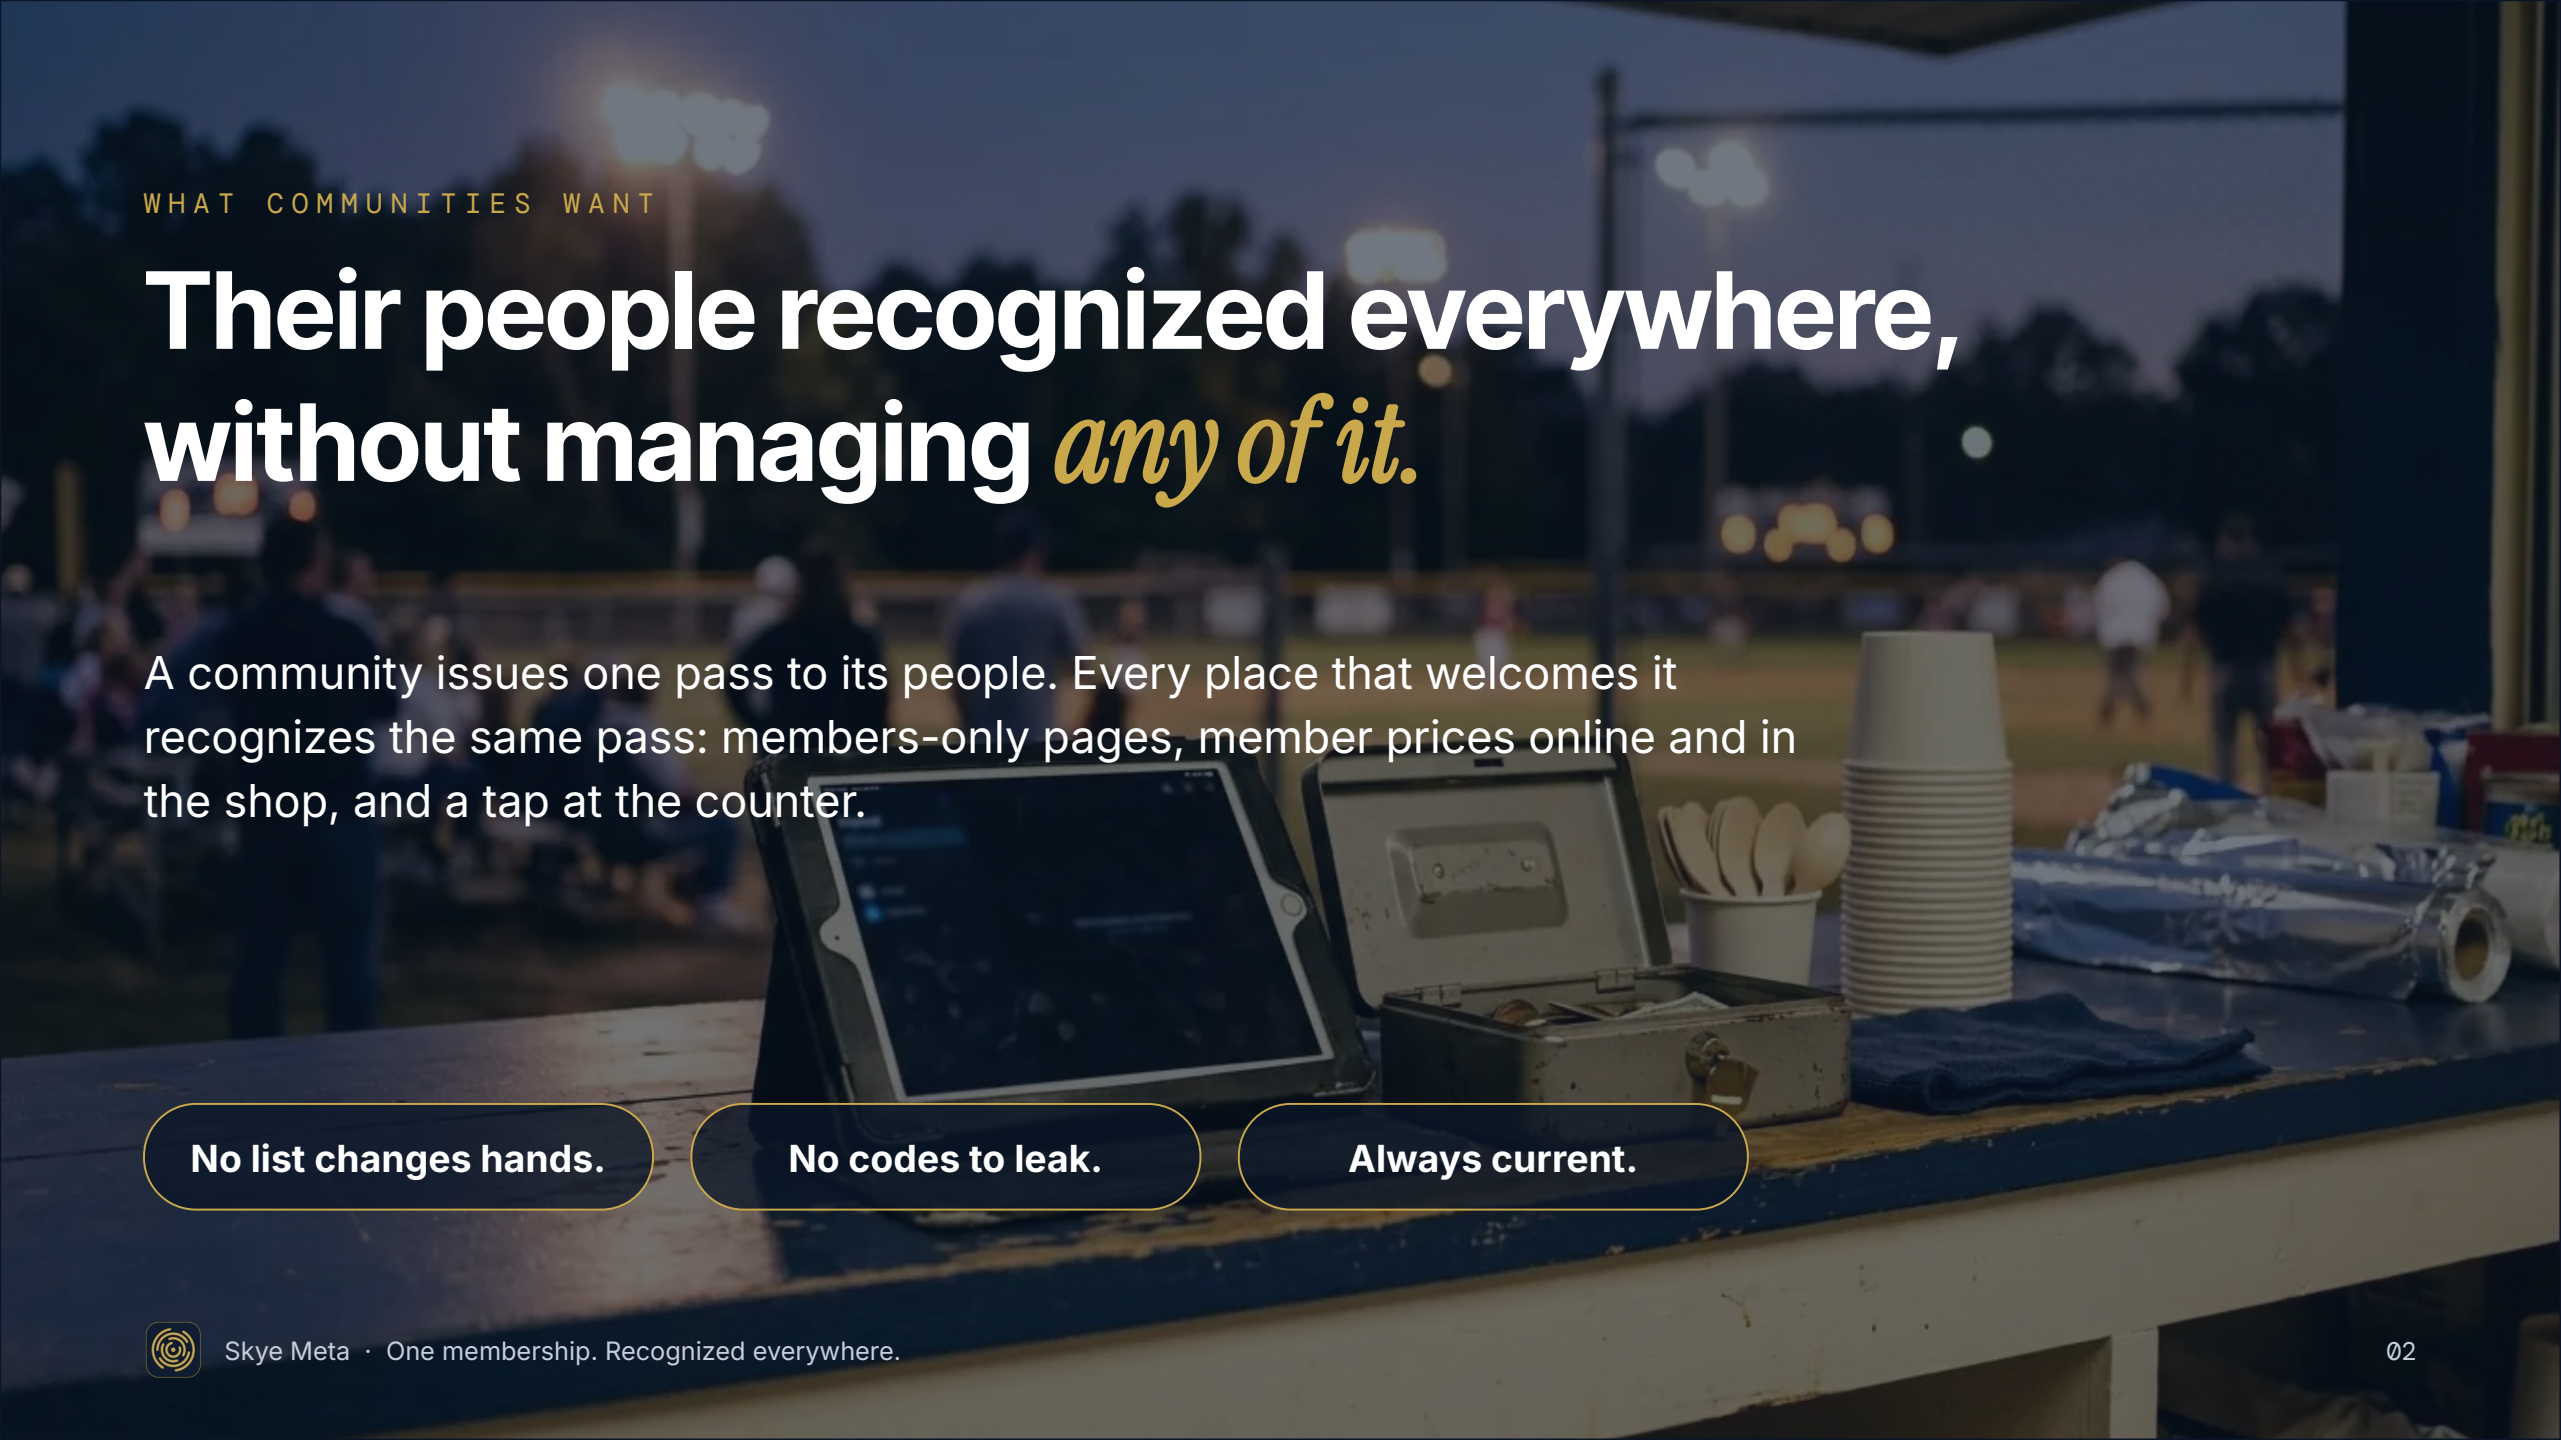
Passwords get shared

A login proves that someone has the password. It does not prove that they belong.

03

Lists go stale

Every partner needs its own copy of the member list, and nobody keeps all the copies current.



WHAT COMMUNITIES WANT

Their people recognized everywhere, without managing *any of it.*

A community issues one pass to its people. Every place that welcomes it recognizes the same pass: members-only pages, member prices online and in the shop, and a tap at the counter.

No list changes hands.

No codes to leak.

Always current.

HOW IT WORKS

Issued once. Recognized *everywhere.*

1

The organization issues a pass

Bothy is where a community creates its pass and sends it to its people by email.

2

The member carries it

On the phone they already have. No crypto to buy. No app to install.

3

Places recognize it

Websites, stores and counters that choose to recognize the pass do so, live, every time.

Always kept honest. Underneath, InsumerAPI, the condition-based access API, checks every recognition and returns a signed answer anyone can check.

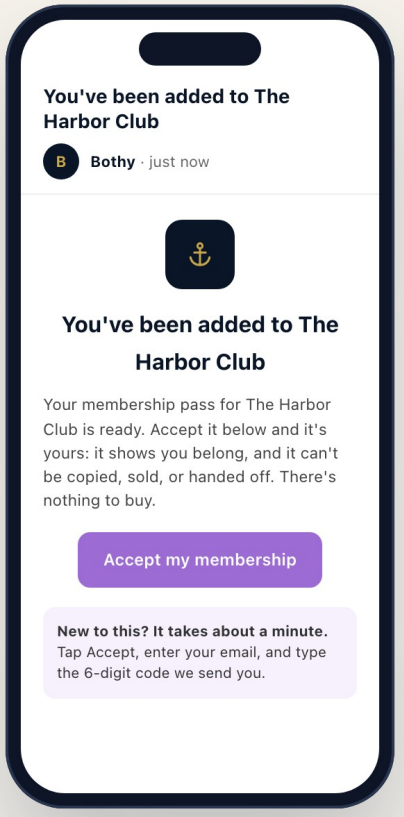
IN PRACTICE

A school issues one pass to its *families.*

A parent opens the PTA directory online, gets the member price at the coffee shop down the street, and is recognized at the spring concert, all with the same pass.

The check only tells the place they are a member. Never who they are, or what they own.

Every family gets an email. One tap, their email and a 6-digit code, and the pass is ready in about a minute.



BOTHY · FOR COMMUNITIES · EARLY ACCESS

Send your people a pass. They tap once, *they're in.*

A club, team, school or group gives its members one digital membership pass. Members get it by email, tap the link, type a 6-digit code, and the pass is ready in about a minute. No app to install, nothing to buy.

Every place the group turns on recognizes the same pass: members-only pages on its website, member prices in its online store, and the Bothy Scanner at the counter. Remove someone in a tap, and nobody else is bothered.

Founding 50: the first 50 communities on Bothy get their first year free.

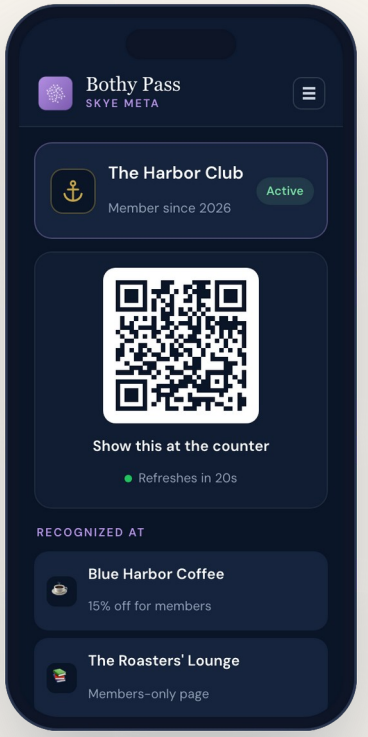
WHAT IT COSTS

Free
to set up the community

$49 / mo or $350 / yr
Skye License. First 50 seats included

$20 per 50 seats
one-time, when a community grows

$0
Members never pay a thing

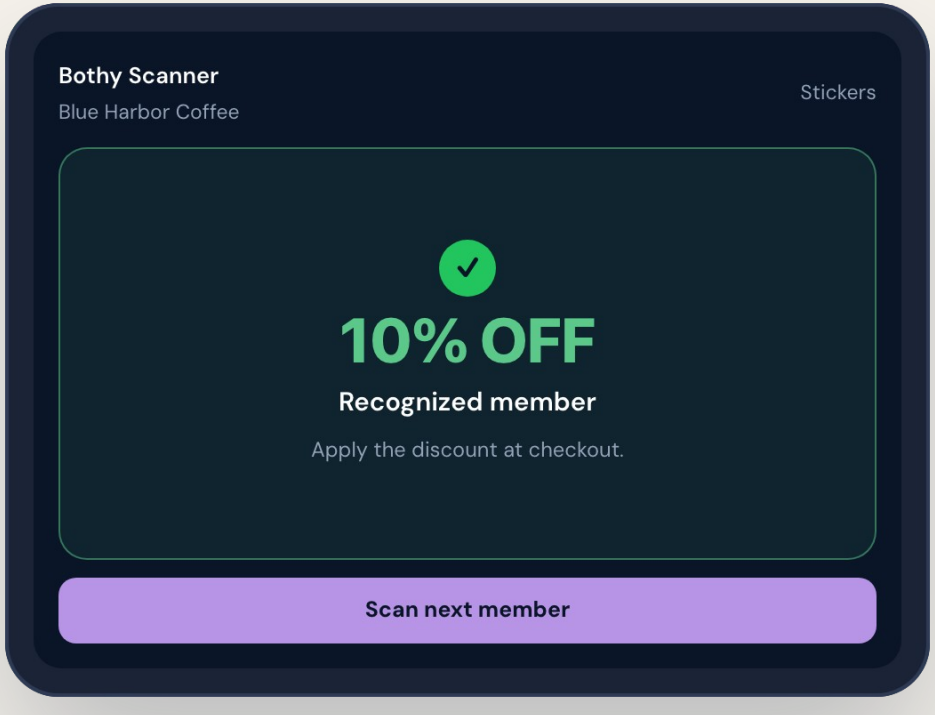


Welcome the groups *next door.*

Give members of local teams, schools and clubs your member price, at the counter and online. You do not need a pass of your own: pick the groups you welcome and what each one gets. Customers pay the way they always do.

- **At your counter** The Bothy Scanner on the phone, tablet or laptop you already have, plus NFC counter stickers members tap.
- **In your Shopify shop** The member price at checkout and at the Shopify register.
- **In your WooCommerce shop** The member price applied on its own with SkyeWoo. No coupon codes.
- **Clover** Coming soon.

From $49 a month per location, with 500 member visits included. Founding stores get their first year free.



Staff see yes or no and the discount. Never the wallet, never who they are.

THE RECOGNIZERS

Where a pass is *recognized*

SkyeGate

Recognition, not passwords.

Members-only pages, posts and downloads on WordPress or Next.js. Lite is free on WordPress.org. Pro is $49 a month or $350 a year, and the same license runs SkyeWoo.

SkyeWoo

Recognition, not coupons.

Member prices at WooCommerce checkout, applied on their own. $49 a month or $350 a year, the same license as SkyeGate Pro.

Skye Recognition for Shopify

Recognition, not coupons.

Member prices at checkout and at the Shopify register. Comes with a store plan; we set it up with the store.

Bothy Pass and Scanner

In person.

The pass a member carries, and the Scanner: a web page at the counter, with NFC stickers to tap. Included with Bothy and with every store plan.

Also live: Skye Meta Recognition for Chrome, so members are recognized as they shop online. Any shop or site on Skye Meta can choose to recognize a community's pass.

PRIVACY

Recognition without *identity*

The membership check tells a place only that someone is a member. It reveals nothing about their identity, their other memberships, or anything they hold. Privacy is the default, not a setting.

Only the real member

A quick, free signature proves the visitor actually controls the wallet that holds the pass, before anything opens.

A signed yes or no

Every recognition returns a cryptographically signed answer that anyone can check. No raw balances or holdings.

Leaving is clean

Removing a member revokes the pass itself. From the next check, it is no longer recognized anywhere.

FOR DEVELOPERS AND AI AGENTS

The same recognition, as *building blocks*

SkyeSkiff

Recognition, not credentials.

Condition-gated sessions for AI agents. Every agent's wallet is attested on entry and re-verified on demand.

Sell the token, lose the session. Paid per call in USDC.

@skyemeta/access

Recognition, not registration.

Free, MIT-licensed middleware that gives AI agents a door into an API, without moving the one human customers already use.

One middleware. Two doors. Zero migration.

SkyeProfile

Recognition, not guesswork.

One call returns eleven independently signed dimensions about a wallet across ten issuers, each verifiable offline.

A live demo, not a paid product.

THE FOUNDATION

Built on *InsumerAPI*

Every Skye Meta product runs on InsumerAPI, the condition-based access API that reads what a wallet holds, evaluates your conditions, and returns a cryptographically signed answer anyone can check.

34
blockchains for member gating

37
blockchains InsumerAPI reads

Signed
every response, cryptographically

$0
members never pay

Skye Meta builds on InsumerAPI. Skye Meta and The Insumer Model are separate companies with the same founder; Skye Meta licenses InsumerAPI commercially.

PRICING AT A GLANCE

Two buyers. Members *never pay.*

COMMUNITIES · PAY FOR THEIR PASS

Founding 50	**$0 for 12 months**	then $49 / mo or $350 / yr
Skye License	**$49 / mo or $350 / yr**	your pass, SkyeGate, SkyeWoo and the Scanner; first 50 seats; 100 visits a month from other communities' members
More seats	**$20 per 50**	paid once, not monthly

STORES · PAY FOR OTHER GROUPS' VISITS

Starter	**$49 / mo**	500 member visits a month
Growth	**$99 / mo**	1,500 member visits a month
Pro	**$199 / mo**	5,000 member visits a month
Scale	**Custom**	chains and big events

Per location; one plan covers Shopify and the Scanner (Clover coming soon). Over the plan, $0.10 per member visit. Paid yearly, two months free. Founding stores: first year free.

A member visit is each time a member of another community gets a store's discount. A community that welcomes more than its 100 visits a month adds a store plan; a store that starts its own membership adds a Skye License. On their own: SkyeGate Pro or SkyeWoo $49 / mo or $350 / yr, SkyeGate Lite free. SkyeSkiff: pay per call or prepaid credits, in USDC. @skyemeta/access: free (MIT).

SEE IT WORKING

Short videos of each product, on the *real thing*

Bothy	Watch a pass get made, sent, and recognized.	3:11	youtube.com/watch?v=7nFX3UWuTeM
SkyeGate	Watch a gate open.	1:35	youtube.com/watch?v=P-0z7WwXYwY
SkyeWoo	Watch a price change on its own.	1:26	youtube.com/watch?v=dZ0zrhRh4To
SkyeSkiff	Watch a session enforce itself.	1:35	youtube.com/watch?v=nqEGfbCdv9k
@skyemeta/access	Watch one API grow two doors.	0:58	youtube.com/watch?v=G9af4nu5JlI
SkyeProfile	Watch a wallet get fingerprinted.	0:57	youtube.com/watch?v=081tJyYJGis

Also public: SkyeGate Lite on WordPress.org, the npm packages @skyemeta/skyegate and @skyemeta/access, the demo store at demo.skyemeta.com, and the Chrome extension Skye Meta Recognition.

COMPANY

Skye Meta *Corp*

Douglas C. Borthwick

Founder and CEO

New Canaan, Connecticut

30+ years of institutional finance experience spanning senior roles at Morgan Stanley, Merrill Lynch, and Standard Chartered Bank. Creator of The Insumer Model, the condition-based access API behind Bothy, SkyeGate, SkyeWoo, and SkyeSkiff. Yale School of Management. Carnegie Mellon University.

WHAT WE SELL

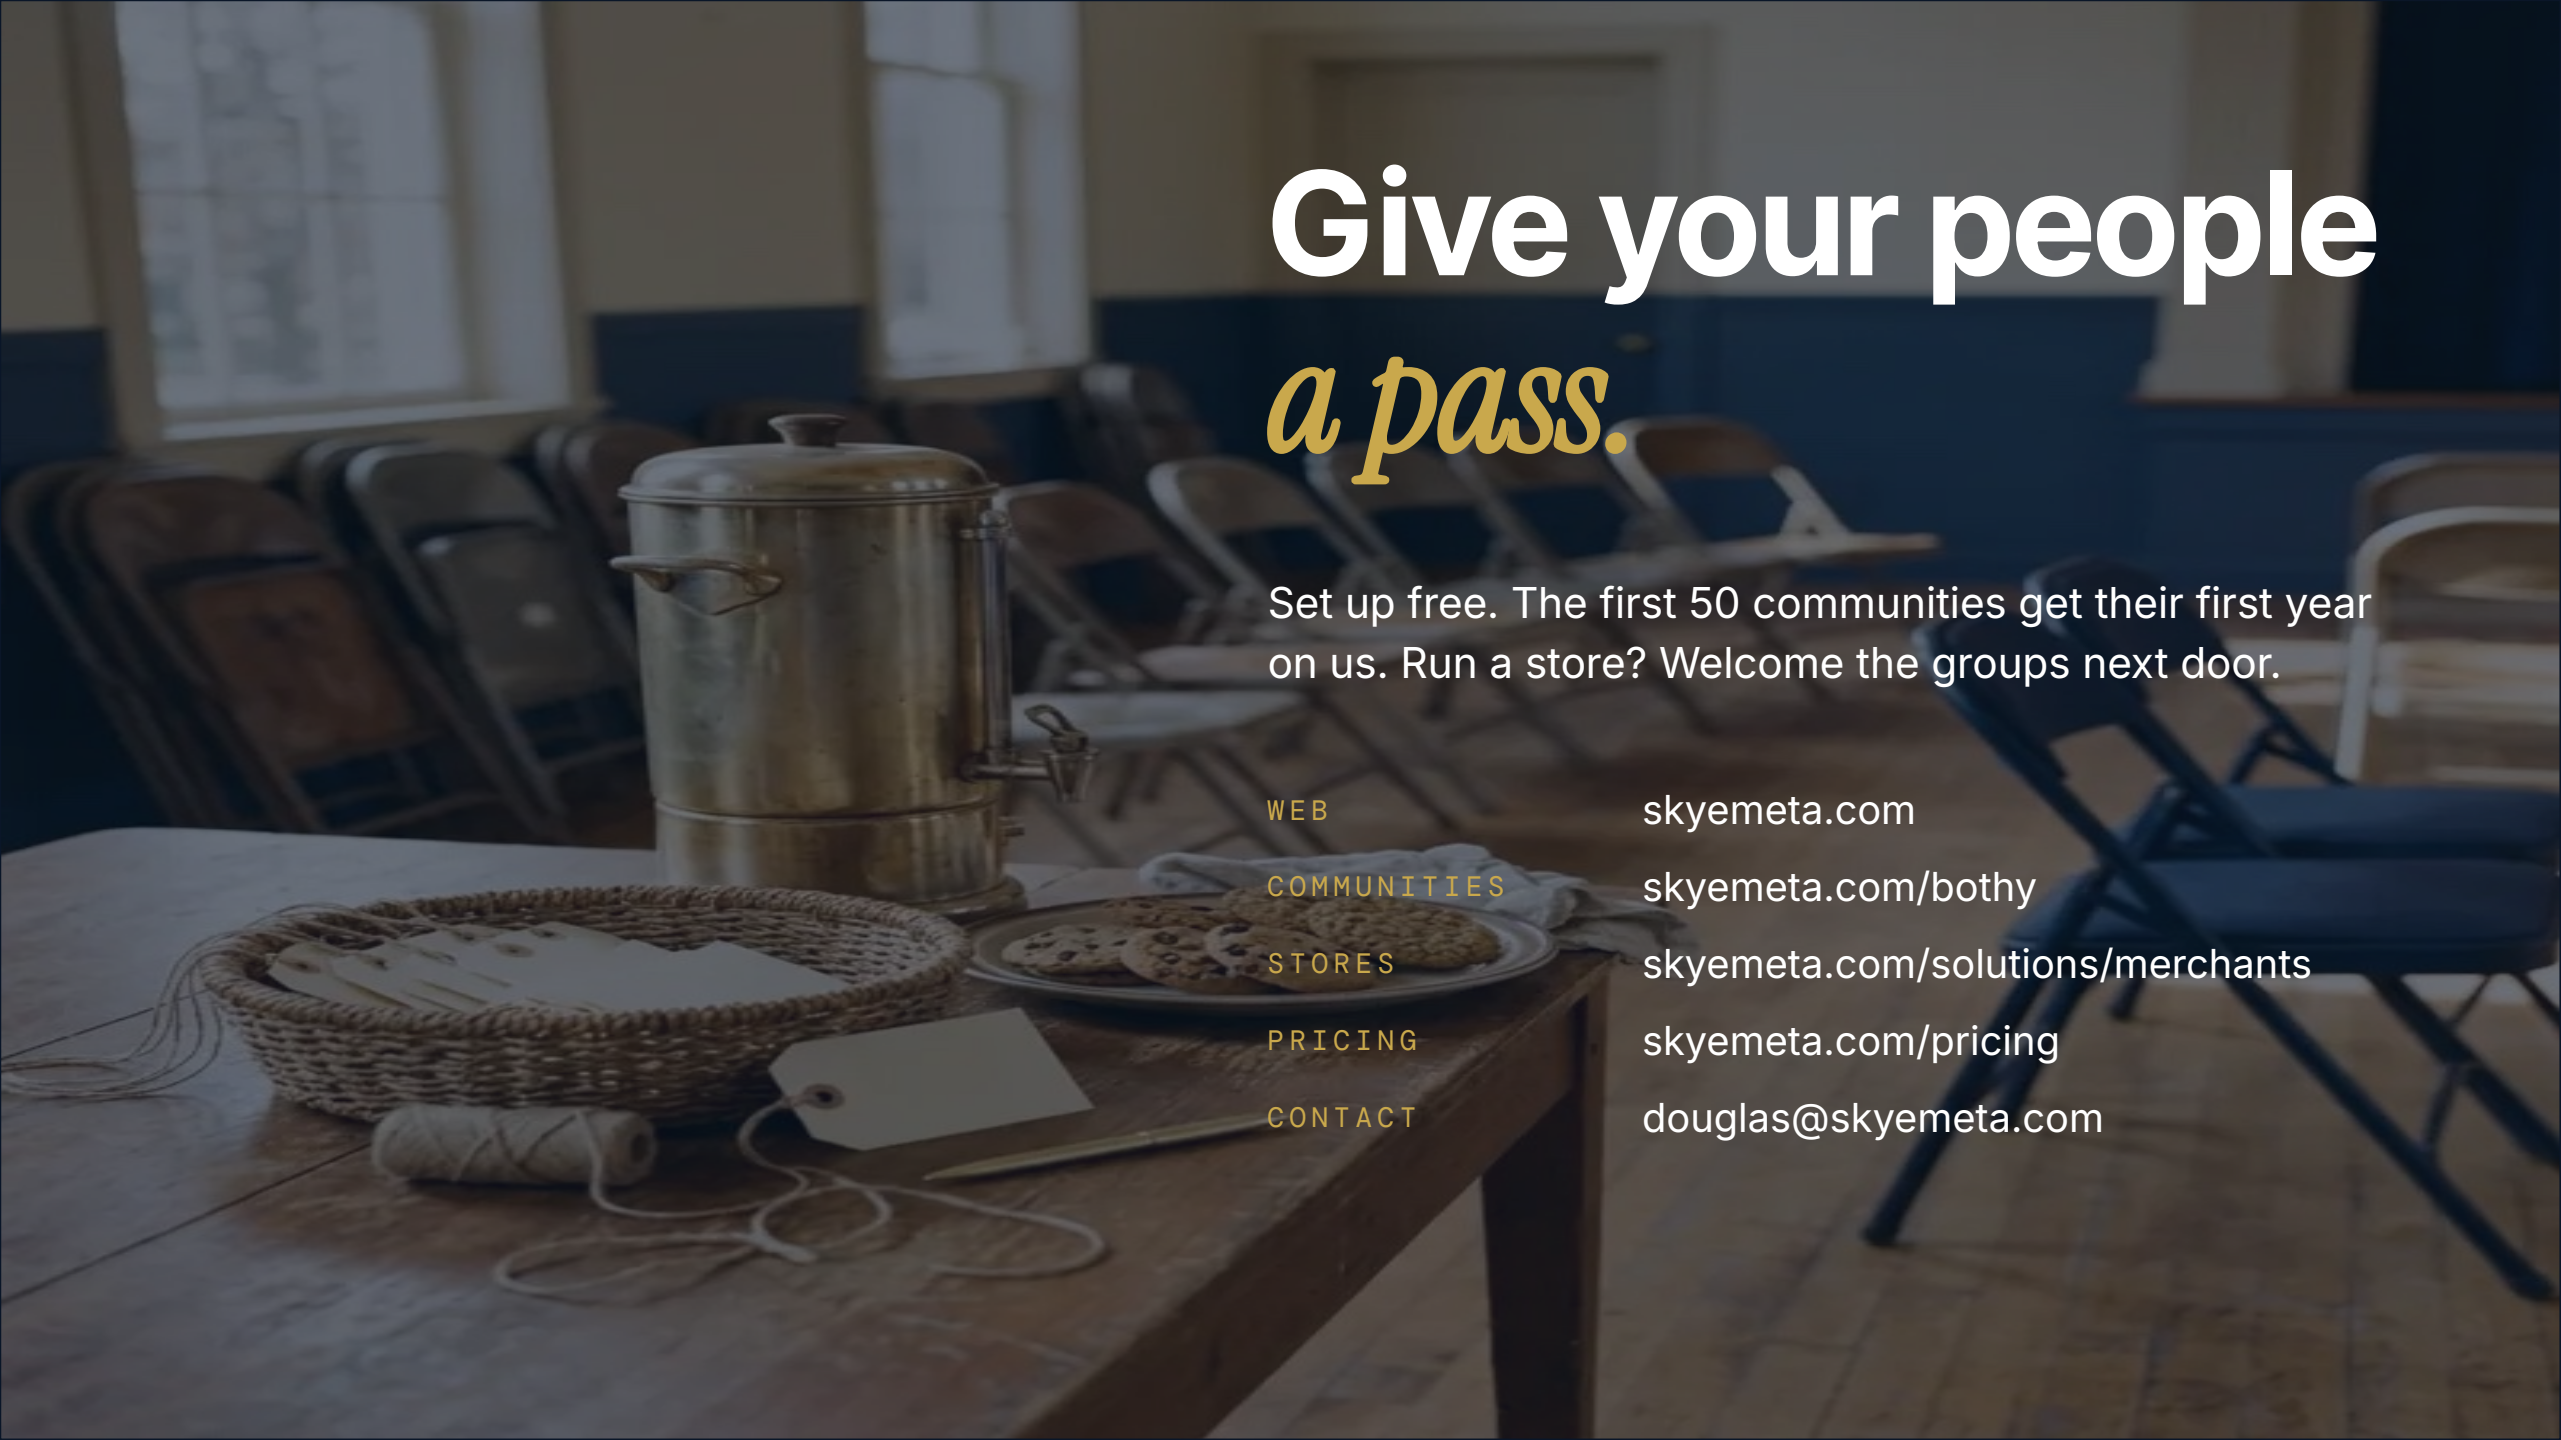
Bothy, for communities that give their members a pass. Skye Meta for stores that welcome other communities' members. SkyeGate, SkyeWoo and SkyeSkiff on their own.

WHERE TO FIND US

skyemeta.com · douglas@skyemeta.com
Instagram @skyemetarecognition · X @skyemetacorp
YouTube @skye-meta · LinkedIn, Facebook: Skye Meta

AVAILABLE WORLDWIDE

Plans are billed in US dollars.



Give your people *a pass.*

Set up free. The first 50 communities get their first year on us. Run a store? Welcome the groups next door.
