

RECOGNITION, NOT REPLICATION.

One membership. Recognized everywhere.

A portable membership recognition network. One pass. Every surface.

Skye Meta

Company overview · October 2026

A membership only works inside your own walls

To make it count anywhere else, a club has to hand something around. Each option fails in its own way.

01

Coupon codes leak

One code gets passed along to everyone, member or not. The discount stops meaning anything.

02

Passwords get shared

A login proves that someone has the password. It does not prove that they belong.

03

Lists go stale

Every partner needs its own copy of the member list, and nobody keeps all the copies current.

WHAT COMMUNITIES WANT

Their people recognized everywhere, without managing any of it.

A community issues one pass to its people. Every surface recognizes it: member-only content, member pricing online and in the shop, a tap at the register, and the door.

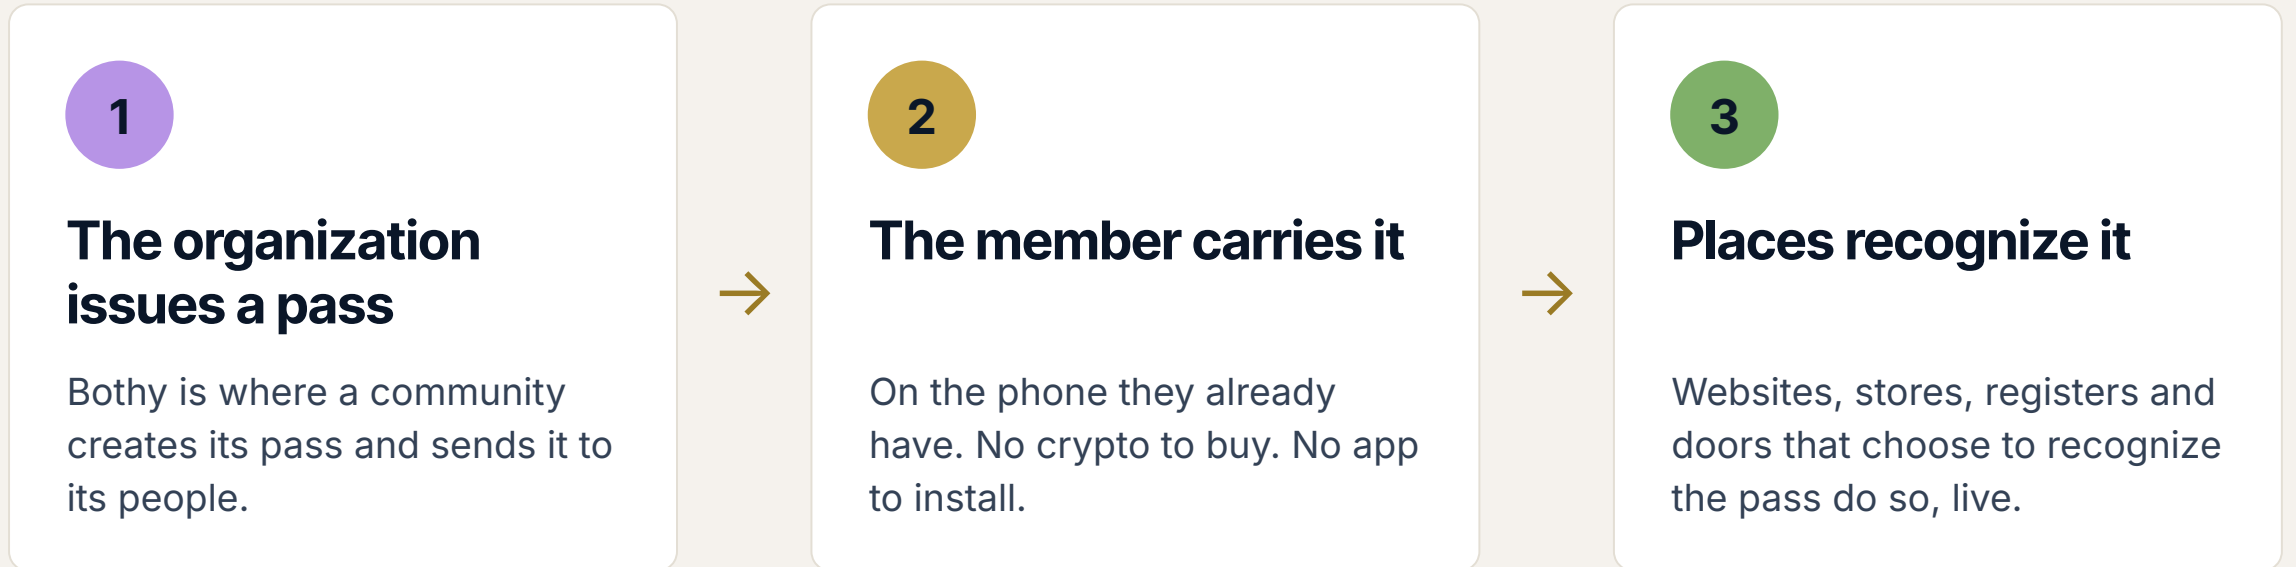

No lists to share.

No codes to leak.

Always current.

Issued once. Recognized everywhere.

Always kept honest. Underneath, InsumerAPI, the condition-based access API, checks every recognition and returns a signed answer anyone can check.

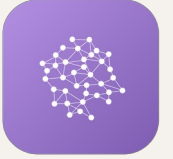

IN PRACTICE

A school issues one membership pass to its families.

A parent opens the PTA newsletter online, gets the member price at the coffee shop down the street, and walks into the spring concert, all with the same pass.

The check only tells the place they're a member. Never who they are, or what they own.

Send your people a pass. They tap once, they're in.

Bothy is a recognition network for communities: portable membership and recognition for real-world organizations and local commerce.

A private spot for any community, club, team, school, or shop.

Members tap one link, enter their email and a 6-digit code, and their pass is ready. No crypto to buy. No app to install.

Founding 50: the first 50 communities on Bothy get a full year free.

WHAT IT COSTS

Free

to set up the community

\$49 / mo or \$350 / yr

Skye License. First 50 member seats included

\$20 per 50 seats

one-time, when a community grows

\$0

Members never pay a thing

Where a pass is recognized

SkyeGate

Recognition, not passwords.

Gates website content on WordPress or Next.js. Lite is free on WordPress.org. Pro is \$49 a month or \$350 a year.

SkyeWoo

Recognition, not coupons.

Gives members their price automatically at WooCommerce checkout. \$49 a month or \$350 a year.

Skye Recognition for Shopify

Recognition, not coupons.

Member discounts online and at the register, with Shopify Checkout and Shopify POS. Plans from \$25 a month.

Pass and Scanner

In person.

The pass a member carries, and the scanner that recognizes it at a register or a members' door. Included with Bothy.

The same recognition, as building blocks

AgentTalk

Recognition, not credentials.

Condition-gated sessions for AI agents. Every agent's wallet is attested on entry and re-verified on demand.

Sell the token, lose the session. 10 free calls to start.

@skyemeta/access

Recognition, not registration.

Free, MIT-licensed middleware that gives AI agents a door into an API, without moving the one human customers already use.

One middleware. Two doors. Zero migration.

SkyeProfile

Recognition, not guesswork.

One call returns eleven independently signed dimensions about a wallet across ten issuers, each verifiable offline.

A live demo, not a paid product.

Recognition without identity

The membership check tells a place only that someone is a member. It reveals nothing about their identity, their other memberships, or anything they hold. Privacy is the default, not a setting.

Only the real member

A quick, free signature proves the visitor actually controls the wallet that holds the pass, before a door opens.

A signed yes or no

Every recognition returns a cryptographically signed answer that anyone can check. No raw balances or holdings.

Leaving is clean

Removing a member revokes the pass itself. From the next check, it is no longer recognized anywhere.

THE FOUNDATION

Built on InsumerAPI

Every Skye Meta product runs on InsumerAPI, the condition-based access API that reads what a wallet holds, evaluates your conditions, and returns a cryptographically signed answer anyone can check.

34

blockchains for member
gating

37

Signed

every response,
cryptographically

\$0

members never pay

Skye Meta and The Insumer Model are separate companies. Skye Meta licenses InsumerAPI commercially.

Simple plans. Members never pay.

Bothy	Free to set up. One Skye License, \$49 / mo or \$350 / yr, runs the community's own tools: the Pass, SkyeGate, SkyeWoo, the Scanner and browser recognition. First 50 seats included, then \$20 per further 50, one-time.
SkyeGate Lite	Free, on WordPress.org.
SkyeGate Pro	On its own: \$49 / mo or \$350 / yr. One license covers WordPress or Next.js.
SkyeWoo	On its own: \$49 / mo or \$350 / yr.
Skye Recognition for Shopify	A separate plan: from \$25 / mo for 500 member checkouts, up to \$400 / mo for 20,000.
AgentTalk	Prepaid credits, 25 to 50 per dollar. One credit per attestation. 10 free calls to start.
@skymeta/access	Free and open source (MIT).

A member or partner who runs their own site or store takes their own license to recognize the community's pass. Recognizing other communities' passes is always included.

SEE IT WORKING

Short videos of each product, on the real thing

● Bothy	Watch a pass get made, sent, and recognized.	3:11	youtube.com/watch?v=7nFX3UWuTeM
● SkyeGate	Watch a gate open.	1:35	youtube.com/watch?v=P-0z7WwXYwY
● SkyeWoo	Watch a price change on its own.	1:26	youtube.com/watch?v=dZ0zrhRh4To
● AgentTalk	Watch a session enforce itself.	1:35	youtube.com/watch?v=nqEGfbCdv9k
● @skymeta/access	Watch one API grow two doors.	0:58	youtube.com/watch?v=G9af4nu5JlI
● SkyeProfile	Watch a wallet get fingerprinted.	0:57	youtube.com/watch?v=081tJyYJGis

Also public: SkyeGate Lite on WordPress.org, the npm packages @skymeta/skyegate and @skymeta/access, and live demos at skymeta.com/skyegate/demo.

COMPANY

Skye Meta Corp

Douglas C. Borthwick

Founder and CEO

New Canaan, Connecticut

30+ years of institutional finance experience spanning senior roles at Morgan Stanley, Merrill Lynch, and Standard Chartered Bank. Creator of The Insurer Model, the condition-based access API behind Bothy, SkyeGate, SkyeWoo, and AgentTalk. Yale School of Management. Carnegie Mellon University.

WHAT WE SELL

SkyeGate, SkyeWoo and AgentTalk, with Bothy as the membership suite that brings them together for a community.
